Mark is experienced in all phases of security consulting including Risk Assessments, Security Master Planning, Electronic Security System Design and Engineering, System Cost Estimation and Project Management. His experience includes consulting to end-users, A&E firms and technology developers in a wide range of environments.

Prior to founding MSB Security Consulting, Mark was with CoVi Technologies, a new start-up in the CCTV systems manufacturing business. As a Director for the company, he provided security technology consulting services and acted a liaison to the security industry.

Mark joined Schiff & Associates as one of the original employees and assisted in growing the company to a recognized worldwide leader in security consulting, design and engineering. The company was later acquired by Kroll. During his 14 years with the firm he managed hundreds of projects including the design and implementation of award winning state of the art Security Control Centers for Fortune 100 companies including, Caterpillar, Deere and Merck. In the process of designing these control centers, Mark has developed many innovative solutions for centralized monitoring systems, Graphical User Interfaces and the consolidation of existing control centers for operating cost reductions.

In his early career, Mark gained extensive experience in the design, installation and maintenance of integrated security systems while employed by Chubb Security Systems one of the nations largest security integrators.

In 2006 he founded MSB Security Consulting, a firm dedicated to the principles of listening to clients to understand needs, and providing expertise to deliver on-time, on-budget solutions. MSB Security Consulting regularly partners with the nations leading A&E firms as a recognized authority in security system design. Working closely with the design team, they develop innovative security solutions allowing security devices to be integrated into the architecture of the facility in an aesthetic, yet cost-effective manner.
